

Dear Sir/ Madam;

We live in a period where export markets are the only viable solution for thousands of companies worldwide. Profits and business opportunities for everybody are –as always- well hidden.

The SME's in most countries need support to unlock the information and help them sell in new markets.

To cover the above need we designed something unique, simple but extremely effective:

“the Export Road Map”

It is a map-like guide for the most important and valuable sources of information on the internet for every potential exporter.

After years of practical export research on the internet we put together a selection of the best information sources for every potential exporter.

We can print the map, adjusted for any business support organisation in any quantity, to be distributed to your members. The cover of the map

will be adjusted to your logo, colours and contact details as well the greeting of the President or CEO.

You can even include an ad or an editorial of a sponsor that might cover the printing cost. You can then distribute the printed, folded maps to your members, hand them out in events, or even sell them for a small price. Prices are as low as 1 euro per copy – depending on quantity.

We believe that all SME's are in desperate need for such tools and will value such an initiative.

For more information, samples or orders please contact us at exports@globalgreece.gr

Always at your disposal
Babis Filadarlis MBA, MIEEx., DipM.

“The Export Road Map”

The Export Road Map contains the best sources of information for everything that a global trader needs, organised in 23 specific International trade areas.
